A powerful automation and analytics platform to manage, monitor, and mitigate vendor risks

About TruOps

TruOps was founded to deliver an integrated security, risk, and compliance management cloud-based platform to address the challenges of over engineered, complex GRC implementations. TruOps is an exceptionally adaptive and simple to use platform created by risk, identity, and security professionals. The software uniquely combines risk management with insider and external threat intelligence to give enterprises a holistic view of risk. TruOps is headquartered in Norwalk, Connecticut.

TruOps Vendor Risk Management

TruOps – Vendor Risk Management (VRM) is a powerful automation and analytics platform to manage, monitor, and mitigate vendor risks.

Highlights

- Integrate global vendors onto one cohesive framework
- Complete visibility into vendor risk
- Streamline and standardize vendor risk assessment processes, right from vendor on-boarding
- Risk profiling to ongoing vendor monitoring and oversight

Risks from extended enterprises continue to be a major security issue in 2019.

Third party ecosystems of business partners (also referred to as extended enterprises) drive significant business value. For some organizations these business partners become a valuable organizational asset—but they also bring risk.

As reliance on third parties continues to grow, so does concern for regulatory compliance and reputational damage arising from third-party actions. Organizations must reconsider how they approach the identification and management of the risks posed by third parties.

Streamline and Automate Vendor Risk Management with TruOps

Initial Vendor Screening	Risk Identification & Assessment	Monitor & Review	Manage & Document

Benefits

- Gain a single system to manage risks across the vendor network
- Strengthen visibility into global vendor risks and fourth-party relationships through powerful reports and dashboards
- Measure and manage vendor risk based on multiple performance indicators
- Enhance compliance with vendor-related regulations
- Enable faster time-to-value and lower total cost of ownership through deployment
- Strengthen collaboration with vendors across regions and countries
- Centralized library and built-in Analytics & Dashboard
- Flexible Data Model and Role-based Security
- External Systems Compatibility
